

A BRIDGE

You need strength and wisdom to make a bridge.

A bridge between technology and fragmented Nature.

A bridge means to get over the sufferings of mankind, not to create it by exploiting nature.

A bridge for filling the gap between development and humanity.

A bridge for joining hearts of mankind.

A bridge for connecting life of the poor and the rich.

A bridge symbolizing positive step towards the progress.

A bridge representing unconditional love & friendship,
and a great symbol of teamwork.

Listen my friends, achieve the impossible.

Self faith will do the miracle.

No matter if our contributions are big or small,

but our bridge will build relations and fill gap between minds and souls.

A bridge which diminishes distance between hearts.

And can conquer ones minds to save earth from those:

who create pollution and leave it for others to suffer;
who use technology to prosper unmindful of its ill effects elsewhere;

who over exploit nature for short term gains and leave it bleeding for others to heal;
who cares for Classes and leave masses in anguish and pain;
who rapes the mind of innocent people to leave trail of terror and despair;
who spreads hatred in the name of Almighty to leave society in turmoil;
who thinks they are powerful unmindful of nature wrath;
who ignores nature's signals in blind race of its economic exploitation;
who distorts facts for their narrow gains.

Yes, you can make such a bridge.

Don't do it in charity, charge toll tax of:

sense of judgment in glorifying Creator creations;
creation of Environment friendly technology for every creature to survive;
commitment to save mother earth from all type of pollutions;
determination to fight against social evils;
relief to those who are victims of mad rush of technology;
unity among classes and masses;
strong will to protect nature and educate others to do the same;
nurturing the young minds with love and care;
providing work and food to people in despair.

Toll tax paid citizen will make this earth worth living.
